ArcGIS Survey123

Training objectives

Create network datasets and learn how to set them up appropriately.

At the end of the course, participants will be able to:

- Install Survey123 Connect
- Create a Survey123 web form with the web interface, starting from a blank Feature Service
- Create Expressions
- Create a Survey123 web form using Survey123 Connect, from a new service / with an existing service / with a template
- Create dependencies between questions
- Share the survey
